

Mahatma Gandhi National Council of Rural Education

Department of Higher Education, Ministry of Education, Government of India

Sustainable Campus Plan - 2021-22

College Success Story

1. Name and Introduction of the Institution (5 lines)

Sanskriti School of Business , Behind Sri Sathya Sai Super Speciality Hospital, Beedupalli Road, Prasanthigram, Puttaparthi – 515 134

Sanskriti School of Business (SSB) was founded in 2010 by Mr. Vijay Reddy in the rural regions of Puttaparthi. Driven by his endeavor to develop the rural youth, SSB was established to be a forerunner in the development and creation of future management leaders..

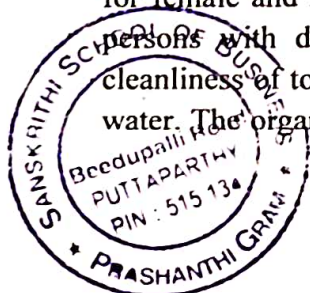

SSB has its inspirations from the unique value-based educational system Bhagawan Sri Sathya Sai Baba that is based on Universal Love, Discipline, and Service. Students are sensitized to the challenges faced by the country and the importance of national development over individual development. It's a never-ending endeavor in SSB to take the message of Bhagawan to the masses in rural areas of the country and support in bringing the students to the mainstream of development, to be able and responsible Corporate Citizens of the Country. SSB will carry on with the tradition and emblem of innovative thinking taking the heritage of this auspicious place to newer heights in the Global map of education and training.

2. Residential Facilities (10 lines)

Include key sustainable features

The College has 3 hostels and 1 guest house. It provides all amenities like round-the-clock supply of safe drinking water, uninterrupted power and provision of hot water through solar panels, Wi-Fi network etc. It has a dedicated housekeeping and maintenance team to maintain these facilities. There are adequate number of toilets equipped with latest fittings and modern anti-skid flooring and exhaust fans. Student toilet ratio in residential area is 6:1 for male, 4:1 for female and 20:1 in the common academic area. Special provisions have been made for persons with disability. Sanitation and hygiene is ensured by proper maintenance and cleanliness of toilets. The College has a mechanized laundry system which saves 70% of the water. The organic vegetables will be grown inside the campus for the hostel Mess. Building,

are constructed which conserves green space and optimizes sun exposure. And also the building design improves ventilation, provides shading and brings in natural lighting, thus minimizing the heat. Push taps are installed in the campus which will ensure to switch them off automatically, eliminates the risk of the tap being left on by a user. These taps ensure appropriate cleanliness as the user doesn't have to contact the tap after washing their hands. Push taps will ensure conserving water also.

3. Solid and Liquid Waste Management in Campus (15 lines)

Include key sustainable features

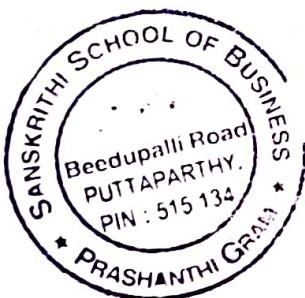

Recycle, Re-Use, Reduce, Refuse, Composting

Collection, segregation and Disposal

Biomedical waste management, laboratory waste management

Administration of waste management

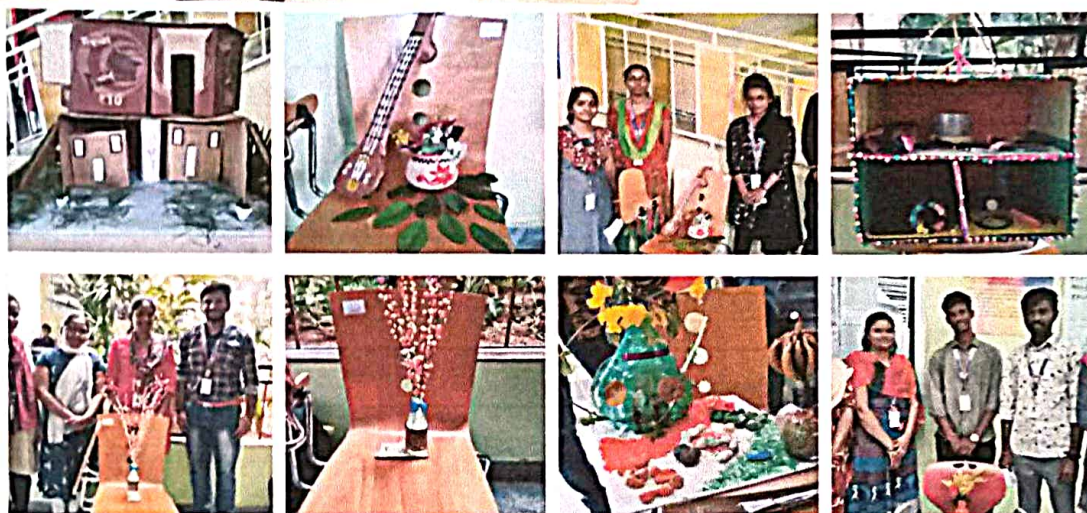

The solid waste generated is mostly papers, answer sheets and waste from kitchen and toilets. The waste paper recycling plant converts waste paper into new papers, file covers, sheets, note pads etc. Dry and wet waste is segregated in separate bins and the garbage is cleared twice a day. Kitchen waste is processed in a vermin compost plant. Weeds, leaves and other garden waste are deposited in organic pits for generation of compost.. The residual water from vermin composting plant is collected in organic pit and used as a pesticide. Rain water harvesting pits are used for conservation of rain water. Untreated wastes are collected in the garbage disposal bins. Biomedical waste and lubricating oil discharged from generator sets are collected by the government approved vendors. To encourage Students in the campus on regular basis we will conduct Wealth out of waste.

water. There are regular food quality checks by the mess committee members. Dedicated staff maintains the hygiene and cleanliness of the kitchen and dining areas. Facilities for recycling including different disposal containers and information available. Organic ingredients. Organic foods, which are produced without harmful pesticides in campus. Use of energy-saving light bulbs. They save resources by never buying unnecessary or single-use items and choosing eco-friendly products whenever possible. It also has a gorgeous garden and terrace for healthy ventilation and air. Push taps are installed in the campus which will ensure to switch them off automatically, eliminates the risk of the tap being left on by a user. These taps ensure appropriate cleanliness as the user doesn't have to contact the tap after washing their hands. Push taps will ensure conserving water also. In built dairy farm was there for the hostel students milk and curd is procured from that farm. And the cow dung compost is prepared and all that will be used for the gardening purpose and especially used for the organic farming.

5. Campus Greenery (10 lines)

Include key sustainable features

Area under green cover (%), nursery on campus, plant protection management, tree plantations, exotic, medicinal, local species plants

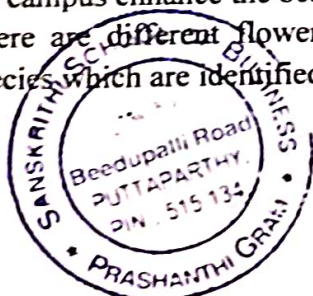

The college is located in Sprawling 50 acres of land in a peaceful, ambience. Spacious, well ventilated classrooms, Laboratories and Seminar Halls are provided for the utmost comfort and convenience for students and staff members. Lush green gardens and vast playground in the campus enhance the beauty of the institute and becomes a beloved space for students.

There are different flowering and shade trees in the main campus belonging to different species which are identified and recorded in the Biodiversity.

Sustainable activities, constructed and non-constructed area, proposed areas for greenery development, land use management plan

- The college planted fruit trees and less water consumption tree besides the road.
- Identified areas adjacent to and near the campus for potential land acquisitions for long term growth.
- The college has identified areas in and around campus for innovative research blocks.
- The college proposes to plant 80% of the unused land for plantations.
- Growing organic vegetables in the area where there is no building and no proper usage of land.
- In built dairy farm was there and with the cow dung compost is prepared and all that will be used for the gardening purpose

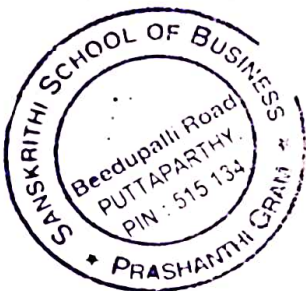

7. Solar Energy Conservation (5 lines)

Include key sustainable features

Solar Panel Installations, demand and supply of energy, solar energy generated (KW per month/year)

College has an in-house solar power plant helps in reducing the system works all year round and cuts down the fuel bills and carbon dioxide emission and many of its installing benefits. It has a great efficiency about 80 percent of the sun's radiation is turned into the heat energy, the best method to obtain hot water at hostels. It will be eco-friendlier and also you can get the plus tax incentives for using renewable energy.

8. Water Management (15 lines)

Include key sustainable features

Quantified water usage, water availability, rainwater harvesting, recycling of water from sewage treatment plant (STP), functional drainage systems

- Push taps are installed in the campus which will ensure to switch them off automatically, eliminates the risk of the tap being left on by a user. These taps ensure appropriate cleanliness as the user doesn't have to contact the tap after washing their hands.
- Push taps will ensure conserving water also.
- Water quality of the college is analyzed by Ground Water and Water Audit Department, Govt. of Andhra Pradesh. Water samples were collected from five wells in the college campus and the water quality is found to be moderate to good and all the parameters are in line with the permissible limits of drinking water standards.
- In order to promote artificial groundwater recharge through rain water harvesting structures from roof top areas with recharge pits are provided over and across the premises
- A recharge pit allows the rainwater to replenish groundwater by recharging the underground aquifers. It can be built to recharge a bore well or just to help the water infiltration in an area.
- The college has installed 2 rain harvesting pits in the college campus.
- The institution has conducted various innovative programmes (guest lectures) and competitions on water conservation and its management involving students of the college and also conducted programmes in adopted villages.

9. COVID 19 Interventions (10 lines)

Include key sustainable features

Sanitation and Hygiene

Counselling

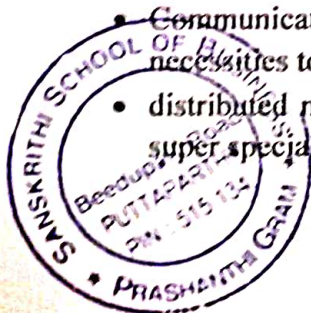

Technology

Other

- Sanitizer is installed and sanitization in the campus will be done on regular basis
- Vaccination camp in the campus thrice for students and faculty
- Distributed vitamin supplements to all the staff in the campus.

Under Shaya (Each one Reach One – Covid Mission) was taken up by the students and they have done the below activities

- Enquired about the vaccination whether the old age people are vaccinated or not and asked data from ANM nurse.
- Created awareness about importance of vaccination with the help of notice board and importance of mask
- Distributed rice in three areas (puttaparthi – local, near Sri Satya Sai super specialty hospital & Gorantla)
- Communicating with neighbors to know their well-being by helping them to get their daily necessities to be accomplished.
- distributed masks to poor people in three areas - puttaparthi – local, near Sri Satya Sai super specialty hospital & Gorantla

Key Institutional Achievements/Outcomes (10-15 lines)

Include key sustainable features

- The Campus has state of the art facilities in the campus
- The hostels are provided with 24 x 7 clean running water and uninterrupted power supply
- There are ample facilities for indoor and outdoor game facilities and free Wi-Fi connectivity
- The hostel kitchen in the campus is well equipped with modern amenities and full ventilation.
- Special care is taken to maintain the hygiene in the kitchen by the workers as well as the Cooks. And mostly to cook organic vegetables will be used which are cultivated in the campus
- Many shady and decorative trees have been planted all over the campus
- The Campus has installed a Roof-Top Solar System
- The Campus has switched over to energy efficient LED lights
- The campus has adopted 2 villages near by
- Sanskrithi conducted Different awareness programs on hygiene for women on menstrual
- Drawing and poster making competition on Swachh Bharat was organised
- Push taps are installed in the campus which will ensure to switch them off automatically, eliminates the risk of the tap being left on by a user. These taps ensure appropriate cleanliness as the user doesn't have to contact the tap after washing their hands.
- Push taps will ensure conserving water also.
- Workshop on recycling, Wealth out of waste through Arts and Crafts was organised
